

British Military Awards for Gallantry Interactive Display Package

- Bring Medal Displays to Life
- Vast Capacity for Citations
- Stunning Interactive Images
- Easy to Modify In-House

It's never been easier to create an eye-catching, informative and interactive display to bring medal collections to life.

British Military Awards for Gallantry is an off-the-shelf multimedia package designed especially for museums. It can be used as-is or tailored to add whatever citations, extra medals and information an individual museum wants. The graphics and branding can be changed too so that any museum can tailor it to 'make it their own'.

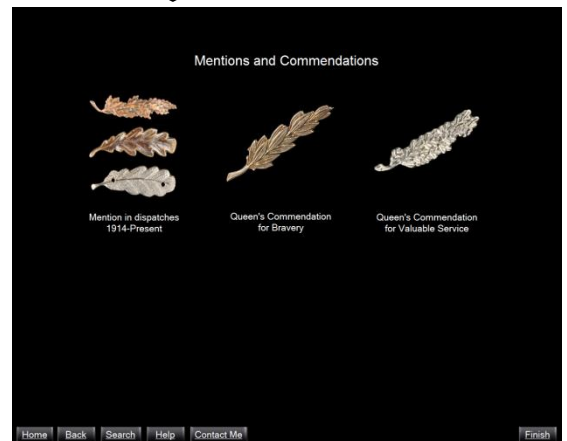

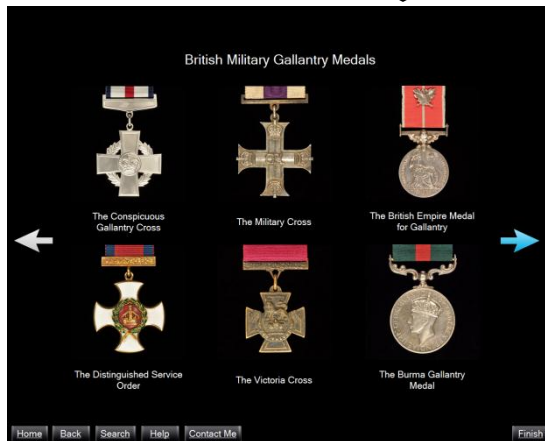

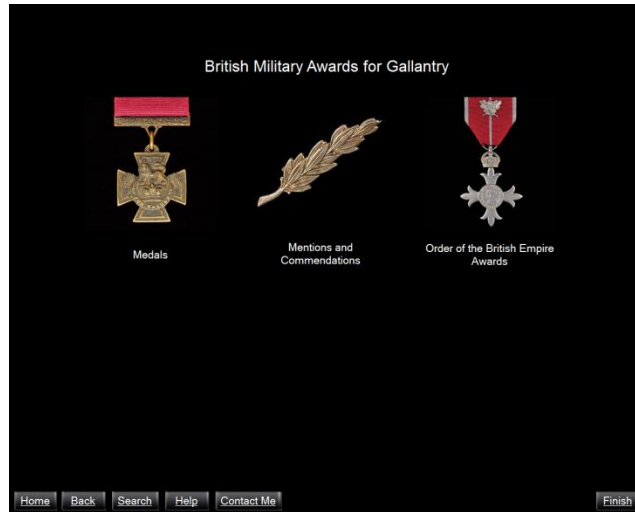

Because it runs on an InfoAktiv system, the package is amazingly easy to tailor, expand, adapt and update. It can be modified by anybody who can use a PC. This removes any reliance or expense associated with using outside contractors and makes it a perfect and very gratifying project for volunteers to work on.

The state-of-the-art package includes jaw-dropping interactive 360° rotating images of the medals, accurately researched written and audio descriptions, and templates to add extra content and citations. It is the best way to get the public to engage with medal displays and appreciate the true significance of the stories and sacrifice that medals represent.

What's in the Package?

Categories for Medals, MIDs, Commendations and OBEs.

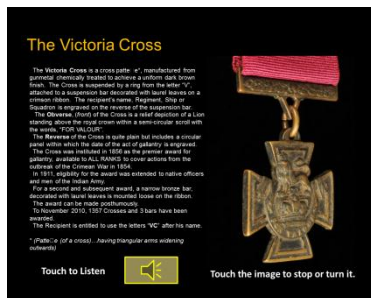

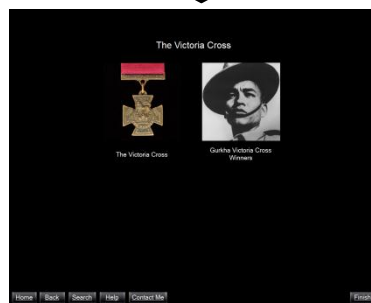

Graphics, text and categories can be customized and expanded to add your own information or branding. Anybody with basic PC skills can do this.

Details of:

- 14 medals
- 5 mentions & commendations
- OBEs

Other awards can be added as required.

Each award has its own 'page' with a written description, high quality images and an audio description of the award. The medals have interactive 360 degree revolving images that the user can turn using a touch screen or mouse.

The description pages are easy to modify using PowerPoint, and a folder with an infinite number of citations can be created using PowerPoint or Word (PDF) documents.
