

World War 1 Interactive Display Package Tanks and Armoured Vehicles

- ✓ **Easy to Modify and Expand In-House**
- ✓ **Free**

An interactive package providing an overview of the development and use of one of the most significant innovations of World War 1 – the tank.

Tanks are one of the highest-profile innovations of World War 1. Invented to break the stalemate of trench warfare, in the course of a few years of warfare they evolved rapidly to become recognisable as the forerunners of today's formidable fighting machines.

World War 1 Tanks is an off-the-shelf multimedia package designed for museums and education. It can be used as-is or tailored in-house by individual organisations to add whatever extra information they want. The graphics and branding can be changed too so that any school or museum can 'make it their own'.

The Benefits of Using InfoAktiv.

Because it runs on an InfoAktiv system, the package is amazingly easy to tailor, expand, adapt and update. It can be modified by anybody who can use a PC. This removes any reliance or expense associated with using outside contractors and makes it a perfect and very gratifying project for volunteers to work on.

InfoAktiv systems are a superb asset and a long-term investment because they can be used and re-used for any subject. Displays never need to become stagnant or out-of-date.

What's in the Package?

More than 30 screens of information about the tanks and armoured vehicles developed and used during World War 1. There are sections for American, British, French and German vehicles.

Layered Information

The basic package is designed to allow visitors to 'dip in' and find out about the topics that interest them. This works for the casual visitor who has limited time to spend on individual items or somebody who wants to dig deeper into specific topics. Owners can add any amount of further information to this package or rearrange the contents to suit their own displays.

Simple to Use

Just touch a picture and it takes the user in to the category or item selected.

Easy to Change

If you, as the system's owner, want to change the layout or structure it is as easy as rearranging folders and files with Windows Explorer.

Graphics, text and categories can be customized and expanded to add your own information or branding. Anybody with basic PC skills can do this.

The description pages are easy to modify using PowerPoint, and an infinite number of folders containing further information can be created using everyday software packages and formats.

Contact InfoAktiv to find out more or try the World War 1 Tanks and Armoured Vehicles package.
