

## InfoAktiv Limited - Customer Finance Programme

InfoAktiv Finance, the official InfoAktiv Limited customer finance programme has been developed to provide the customers of InfoAktiv and its partners with a simple, flexible and comprehensive method of acquiring new InfoAktiv products.

### The Product

The InfoAktiv Finance programme provides a flexible one to three year finance agreement, with payments matched to suit customer requirements. It has been structured to enable the contract to be financed from either revenue or capital budgets.

The overall flexibility of the programme is derived from working with a specialist source for both the products and finance.

This simple but flexible and competitive approach makes the InfoAktiv Finance programme outstanding amongst bank based offerings.

InfoAktiv Finance is designed to offer customers a rental style product, where rentals are paid periodically from revenue budgets for the use of the products. As an 'in-house' scheme, InfoAktiv Finance will work with InfoAktiv and its partners to help manage the financial aspects of a project and to provide whatever flexibility is needed.

### Benefits Summary

- *Flexibility – you can upgrade your solution as the need arises, often without increasing your annual costs.*
- *Tax benefits – rentals can be expensed through your P&L account and can be tax deductible.*
- *Eases cash flow – by spreading the payments over a period of time, you can match the payments to the savings you gain from InfoAktiv, thereby easing your cash flow.*
- *Bank lines unaffected – A rental agreement generally has no effect on your other banking options.*
- *No security required – unlike most banking facilities, rental does not normally require you to pledge additional assets, as the products under the finance agreement often provide the security.*
- *Frees up cash – Instead of spending a lump sum, you can use your cash resources for investment in other projects.*
- *All of your solution can be considered for inclusion within the rental agreement – software, hardware, installation costs and professional services.*
- *Simplicity – financing your InfoAktiv solution with InfoAktiv Finance is easy.*
